Material key

Our material

All materials fulfil the standard EN 13795,such as low number of particles, absorption capability, impermeability to micro-organisms and tear strength are more than fulfilled. We co-operate with certified suppliers, and you can be certain that the products used by them are subject to high quality standards.

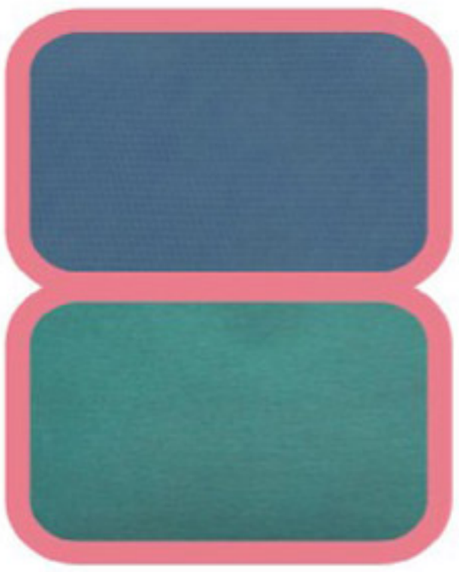

SMS,SMMS,SMMMS material

SMS,SMMS,SMMS material is composed of 2layers of spunbonded fabric and 2layers of Melt blown fabric.The polypropylene fibres have the advantage of building barriers against bacteria and repelling blood and other liquids. With good tensile strength,high filtration,lint-free,breathable,Material can be with Anti-alcohol,anti-blood,anti-static,anti-oil and softness treatment
Application:Gowns&Drapes,Sterilization Wrap

Spunlace material

Spunlace nonwoven consist of a fleece material, structure due to its skin comfort with its soft texture,smooth surface, lint-free,high wearing comfort,breathable,tear-proof, against bacteria and repelling blood and other liquids,.High repellent esp.against bacterial transmission.
Application:Gowns&Drapes,Towel

Dual-layer material

With its absorbing and liquidtrapping property double layer material has become more widespeadly .During the surgery,the top layer is highly absorbent material,quickly absorbs any type of liquid that comes onto the cloth and PEfilm creating the bottom layer prevents absolute liquid penetration.Its high barrier against bacteria, impermeability to blood and other liquids ,lint-free, good drapability.Regular two style:1. Absorbent PP +PE,2.Absorbent Viscose+PE.
Application:Drapes,Equipment Cover,Reinforced Area

Trilaminate material

A combination of Spunbond PP+PE film+Absorbent viscose.,absorbent in top layer,fully liquid resistant in middle layer and PP fabric in contact with patient's skin ,which is meant to prevent hypothermia of the patient during long operations.Its high barrier against bacteria,impermeability to blood and other liquids, lint-free, good drapability.
Application:Drapes

Medical Tape

Medical tapes which have non-irritating characteristic to skin,are used for securing the cloth to the patient's skin or for creating a barrier around the surgery zone.It minimizes the microoraganism transfer from or to the surgery zone

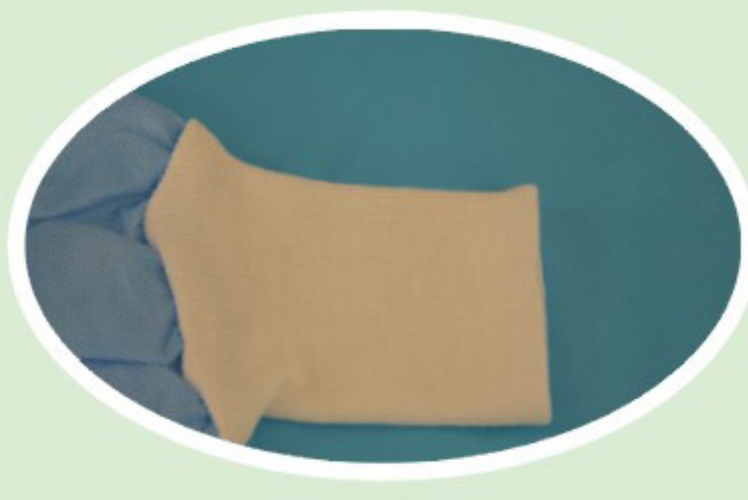

Incise Film

Incise film layer which has non-irritating characteristc to skin,helps to maintain good adhesion by adding it in between the clothes during surgery or by using it alone in the surgery zone.It also creates a barrier against infections.

手术衣

SURGICAL GOWNS

Knitted cuff

Over-locking

Double sewing

Ultrasonic

"C&P"gowns has designed with safety,comfort and flexibility.We offer different fabrics which can meet EN13795 and AAMI Level3& Level4 performance requirements.
The variety of different material and models give you an option to choose the right gown for comfortable and protected procedure.Wide range of Surgical Gowns provides the advanced solution in deferent levels of protection to help protect patients and staff from the spread of infection during Surgery

Performance

- ⊙ Fluid Repellent
- ⊙ High Barrier performance
- ⊙ Cool and Breatheable
- ⊙ Low Lint
- ⊙ Latex Free
- ⊙ Adjustable Velcro Neck Fastners
- ⊙ Raglan Sleeves
- ⊙ Knitted Cuffs
- ⊙ Sterile gown is packed with 2towels in a paper wrap and peelable bag
