

Brief Introduction

Acne Patches is kind of hydrocolloid dressing, it keeps the skin under it moist, which increases skin permeability. Keeps the active ingredient in place so it doesn't get rubbed off accidentally. The patch protects your pimple from rubbing and touching, and it keeps the wound moist so it heals faster and better.

Our Advantage

Support OEM production for any shape, formula, size, color and packing.
Support add ingredient such as essential oil, salicylic acid, hyaluronic acid, vitamins.
